## PERSONAL PROFILE

Fourth-year Software Engineering student aspiring to be an IT Business Analyst. Experienced in requirement gathering, analyzing market viability, and bridging the gap between technical teams and business stakeholders. Strong background in software development and eager to leverage analytical skills to drive data-driven business solutions.

## WORK EXPERIENCE

### University Project: AI-Powered Room Booking System

#### Project Stakeholder / Business Consultant

2026

- Acted as the primary stakeholder for an AI-powered room booking system tailored for a sophomore project.
- Defined core business requirements, project scope, and success metrics.
- Evaluated project deliverables to ensure strict alignment with established business goals.

### Senior Project: AI Dental Implant Detection (Collaborated with Faculty of Dentistry)

#### Business Analyst & Project Manager

2025 – 2026

- Led requirement gathering and managed the Label Studio data pipeline to deliver a YOLO-based AI dental detection system.
- Bridged communication and workflows between technical development teams and clinical dental teams.
- Conducted comprehensive TAM/SAM/SOM market analysis for AI-ready hospitals in Thailand.
- Designed a future premium subscription strategy to drive commercial viability and product growth.

### University Project: Pin & Plan (Travel Planning App)

#### Business Analyst

2024

- Elicited and documented detailed user requirements for a web-based travel planning platform.
- Designed user flows and wireframes utilizing Figma to align business goals with technical implementation.
- Facilitated Agile project management processes to ensure efficient team collaboration and timely delivery.

### University Project: Himmaphan (Dormitory Booking App)

#### System Analyst & Frontend Developer

2023

- Analyzed student requirements to design the core system architecture for a dormitory booking application.
- Developed a responsive frontend interface using Bootstrap and JavaScript to ensure a seamless user experience.
- Aligned technical development with overarching business objectives, ensuring the final product fully met user needs.

## EDUCATION

2023 – Present

### Mae Fah Luang University | Bachelor of Software Engineering

- Cumulative GPAX: 3.33 (Recent Semester GPA: 3.87)
- Relevant Coursework: Enterprise Architecture and Digital Strategy, Software Construction and Evolution.
